## Catalogue

# Presentation

The FERTILPOT is a biodegradable pot made of **wood fibers**. It is used and suitable in horticulture, ornamental, viticultural or forestry nurseries, as well as in market gardening.

Its **penetrability by water, air and roots** is exceptional. This property, combined with its good mechanical resistance, has made the success of FERTILPOT throughout the world.

FERTILPOT can be used by everyone who are looking for a faster cultivation, an excellent root system and no transplant shock when planting into the soil.

It is also the solution to the need of the users who are looking for **“ready to plant” products which respect the environment.**

FERTILPOT in few words :

<ul style="list-style-type: none"><li>✓ « Plantable » : the plant can be put into the ground with its pot</li><li>✓ Natural : wood, only wood</li><li>✓ Local sourcing, wood PEFC certified</li><li>✓ Compatible with Organic Farming (according to RCE 834/2007)</li></ul>	<b>ECOLOGY</b>
<ul style="list-style-type: none"><li>✓ Root pruning : no root coiling, stimulation of secondary root growth</li><li>✓ Permeable to the air, water and roots.</li></ul>	<b>AGRONOMY</b>
<ul style="list-style-type: none"><li>✓ Productivity gain : faster repotting, reduced planting densities.</li><li>✓ No more storage or treatment of plastic waste</li><li>✓ Made in France, local sourcing of raw materials</li></ul>	<b>SOCIAL ECONOMY</b>

# Presentation

FERTILPOT range is very wide to cope with the diversity of situations. See our list of references. The pot can be round, square, with or without lugs; their dimensions vary between 4 x 4 x 5 cm (35 cm<sup>3</sup>) and 17 x 16 cm (3 liters). The pots can be packaged in a tray (FERTILPACK).

Below our main models:
